Manila, Philippines | 09928203847 | aranzanzo.aethan@gmail.com

PROFESSIONAL SUMMARY

Magna Cum Laude Computer Engineering graduate from Pamantasan ng Lungsod ng Maynila. Full-stack developer proficient in React, Next.js, and Node.js with a strong foundation in software engineering, data analysis, and UI/UX design. Proven track record in project management and cross-functional collaboration.

TECHNICAL SKILLS

- Web Development:** Next.js 14, React, Node.js, Express.js, HTML5, CSS3, Tailwind CSS
- Software & Databases:** Python, Java, C++, C#, MongoDB, SQL, Prisma ORM
- Tools & Creative:** Unity3D, AR Foundation, Firebase, Cloudinary, UI/UX Design, Videography

EDUCATION

Bachelor of Science in Computer Engineering
Magna Cum Laude
Pamantasan ng Lungsod ng Maynila
Sept 2021 – Oct 2025

PROJECTS

BlogSpace – Full-Stack Blog Platform

- Developed a production-ready platform using Next.js 14 (App Router) and TypeScript, implementing Prisma ORM with MongoDB for scalable data management.
- Engineered a secure JWT-based authentication system with Bcrypt, featuring email verification and middleware-protected routes.
- Integrated TipTap Rich Text Editor for seamless content creation and Cloudinary for cloud-based image hosting with automated validation.
- Implemented advanced real-time search with debouncing, a dynamic like/comment system, and server-side pagination to optimize UX.

ARise: Augmented Reality (AR) Training (Capstone Project)

- Designed Unity3D-based AR games for children with ADHD to improve motor skills and cognitive engagement.
- Implemented interactive modules using AR Foundation and C# that respond to body movement and object tracking.
- Analyzed post-intervention user data using SPSS to measure quantitative improvements in coordination.

Dynamic Church Website & Information Hub

- Built a full-stack informational site using the MERN stack (MongoDB, Express, React, Node) to enhance community engagement.
- Integrated a Gemini-powered AI Chatbot via a custom Node.js endpoint to provide 24/7 visitor assistance.
- Developed a RESTful API to handle secure contact form submissions directly to administrative email.

INTERNSHIP EXPERIENCE

IT Intern | St. Joseph School of Gagalangin | Jan 2025 – Mar 2025

- Maintained IT infrastructure and provided technical troubleshooting for staff and faculty.
- Collaborated on technology integration initiatives to improve overall user experience and digital reporting.
